

Armandas Diadko

Student

Developed countless scripts, programs, and web pages using programs such as **Java**, **SQL**, and **Python**. As for now, I am looking for an entry-level position in the industry, for the purpose of enhancing my professional and IT skillset within the IT industry. I have a huge amount of work experience with many different positions in different jobs throughout the years. I'm an efficient and effective worker deep down who has a passion for learning and improving myself.

SIGNIFICANT PROJECTS UNDERTAKEN

Online Device Store

- A team project consisting of three individuals involves the development of an online shop, where users can browse and purchase portable devices online. The project was done using a Play Framework on a Linux virtual machine. The database side of the project was created using SQL and Oracle11G. The project consisted of an accounts authorization system, where a user can create and login into their account where they can leave comments on different devices and add them to their cart.

Challenges faced:

- Finding a solution for multiple users saving changes to the same file
- Deciding what type of remote communication to use

Technologies & Tools Used:

- Linux shell scripting, HTML, Play framework, Virtual Machine, Java, SQL, CSS, Node.js
